

The Luminary Program

AS A LUMINARY CENTER, YOU WILL RECEIVE THE FOLLOWING:

- A customized Luminary plaque to proudly display in your office's waiting room
- Window cling Luminary decals for your interior and exterior doors and windows
- To distinguish your clinic as being innovators and providing the most advanced care available, a pre-written news release announcing your adoption of the OnControl System for you to distribute to your local media outlets as you choose (Electronic version provided)
- A fact sheet that will provide background information on Vidacare and the OnControl System, for inclusion in news releases (Electronic version provided)
- An informational flyer for your patients, that can be customized with your clinic's information and logo – designed to help patients understand what your adoption of the OnControl System means to them (Electronic version provided)
- Recognition on the OnControl website as a Luminary Center.

What is the Luminary Program – How can I participate?

The OnControl System by Vidacare is the first significant advance in bone marrow procedures in decades. The System addresses issues faced by clinicians and patients alike, and cancer clinics that adopt this exciting technology deserve recognition.

The OnControl Luminary Program is designed to recognize cancer clinics that have made the decision to be an early adopter of this innovative technology. By providing this significant advance to their patients, Luminary Centers set their practice apart from other cancer clinics. Vidacare believes these Centers are establishing a new standard for commitment to excellence for their patients, and should be recognized. Participation in the Luminary Program will enable your patients to see your dedication to their comfort, facilitate communication of this commitment to your local media, and educate your patients about this cutting edge technology.
